

MOBILE SOLUTIONS

Deployments for Transit

From buses to emergency vehicles, Verkada’s hybrid cloud solution makes it possible to deploy best-in-class video security with live monitoring and powerful insights.

Video Security Without Limits

Flexible Deployments

With a durable exterior and simple installation, Verkada cameras are suitable for almost any vehicle, from school buses to heavy rail.

Reliable Storage

All footage is safely stored and retained locally on each camera with optional cloud backup for viewing footage while vehicles are offline.

Remote Monitoring

Video feeds and insights are readily available from Verkada’s cloud-based software, allowing easy access to live streams and historical footage from any browser or mobile app.

What’s Required

- 01 Mobile Router**
 Products like Cradlepoint provide continuous connection to cellular or WiFi networks.
- 02 PoE Connection**
 Powering the camera only requires a mobile PoE switch or a PoE injector.
- 03 SIM Card**
 We recommend an unlimited data plan for access to live feeds and continuous cloud backup.
