

Subject: Hydrogen & Petrol or Diesel dual fuel system in road transportation

Objective:

Model Specific Hydrogen Fuel systems for Cars - 15 to 50% reduction in energy costs, sufficient reduction in CO₂ & NO_x emissions.

Current best solution:

Dynacert - HGV emissions reduction technology

https://www.youtube.com/watch?v=eP_mesT-T9w

Expertise required:

Practical - Multi Skilled Engineer proficient in combustion engine component placement/architecture.

Result:

OEM Quality hydrogen dual fuel systems for the top 1000 car models.

Vehicle licence plate driven product selection - model specific component selection & installation hardware.

Approved installation garage access to model specific installation & optimisation instructions.
