

## Subject: Hydrogen & Petrol or Diesel dual fuel system in road transportation

### Objective:

Adjusting the Engine management electronics for optimum fuel economy gains while maintaining OEM performance.

### Current best solution:

Green Source Pro Tuner

[https://www.youtube.com/watch?v=oBazQ\\_vMHhE](https://www.youtube.com/watch?v=oBazQ_vMHhE)

### Refinements to implement:

Advancement of technological functionality, user interface and aesthetics to create electronics suitable for the likes of high end vehicles such as Porsche.

### Expertise required:

Theoretical - Professor versed in combustion engine optimisation

Practical - Multi Skilled Engineer proficient in combustion engine management electronics.
