Our solution is to create a global network of small manufacturing businesses which are connected by common purpose and who support each other by open source sharing of knowledge and resources.

The aim is to develop in to creative and multi disciplinary communities within Cities and natural settings.

# Co-star Group

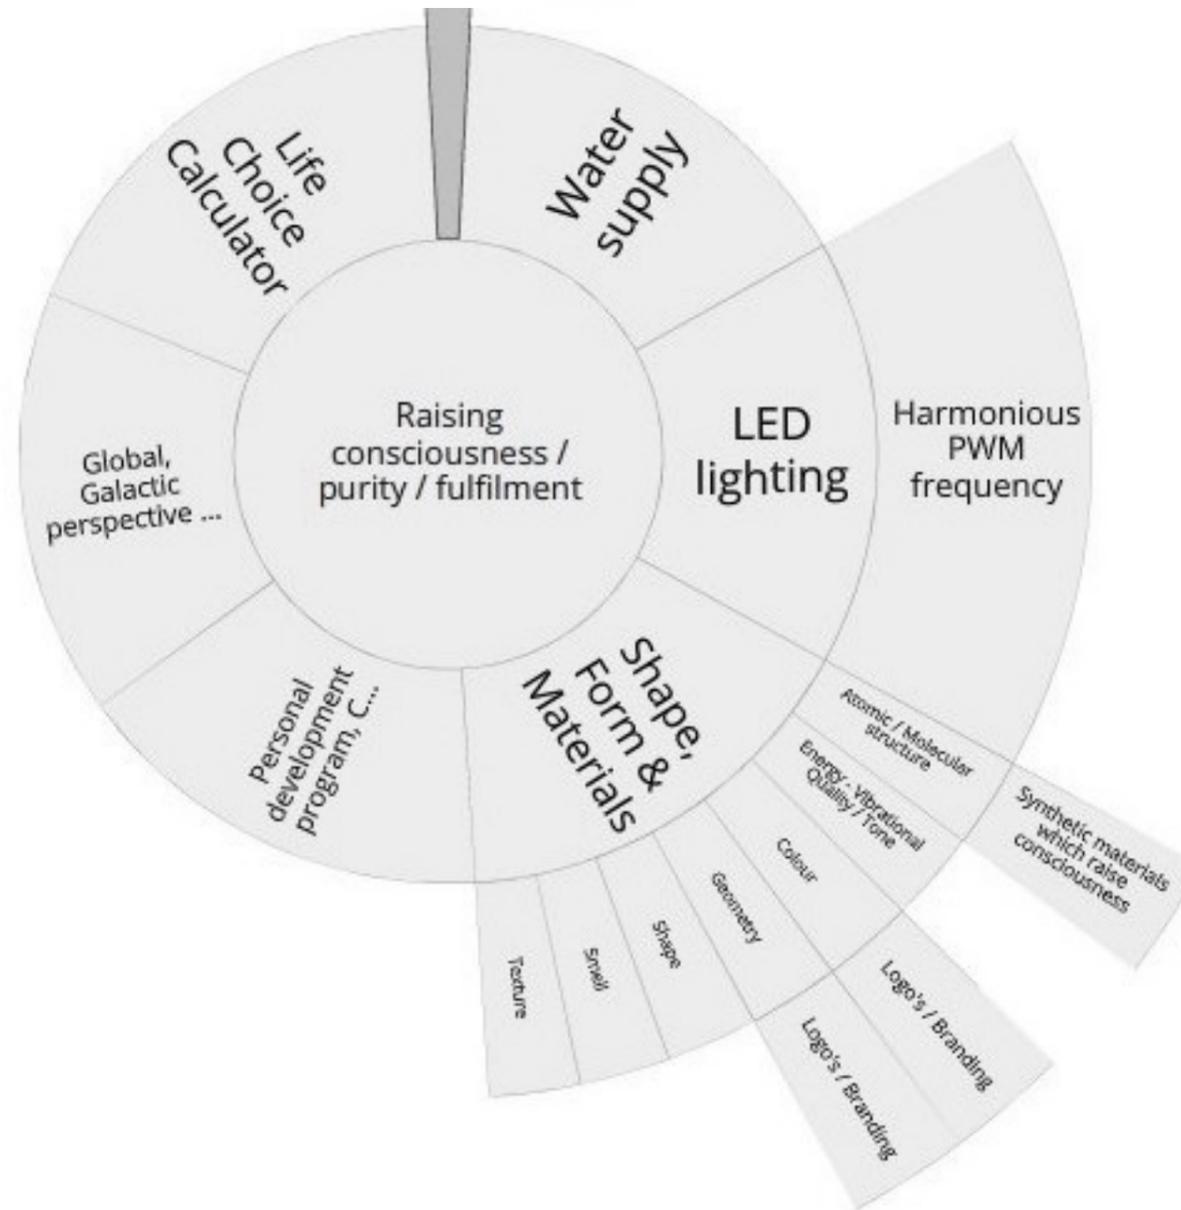

We are looking for people, community leaders, who wish to operate independent yet interconnected localised businesses.

Using the sociocratic method, a 30 hour working week, automation of mundane tasks and a transition to creative positions - The first step is to create a pollution and cost free energy supply. Over time all physical goods can be produced locally. As a global community we will have the strength to take on multiple corrupt or impure industries and to build new cities.
