E980163 EARTH STATION TECHNICAL REPORT

LCE Newport Beach IT, Inc has 20 Percent Ownership in Stock Trade.

Of Earth Station in White Spring FL price is \$25 Million Space and Weapon Communication with LCE Black Box.

- A. BACKGROUND The C-Band Earth Station at White Springs is a descendant of the Earth
- B. Station that was located at the Telford Hotel in White Springs, FL, and decommissioned on 12-31-97. That original Earth Station was built and licensed in 1991 for Peoples Network, Inc. (PNI) and was protected from terrestrial interference from *horizon to horizon*. It was coordinated and sited in White Springs, FL, due to the fact that there were few interfering terrestrial microwave towers and cellular telephone service had not yet come to the area.

An "all satellite" (ALSAT) license was easier to obtain at that time. Locating such a facility now ... anywhere in the County .. especially with horizon to horizon protection, would be extremely problematical because of the proliferation of terrestrial cellular telephone and wireless transmission.

The PNI Earth Station was sold in 1996 to United Broadcasting Network, Inc. (UBN); the radio network of the United Auto Workers union known as The U.A.W.

This was part of a five million dollar investment for part interest in the facility by the Union. The U.A.W. subsequently began moving their radio network to the UAW headquarters in Detroit, MI. PNI was able to obtain the information the UBN Earth Station was about to be decommissioned because they held a mortgage with a UCC-1 registration on the original Earth Station.

PNI and its subsidiary American Community Oriented Radio Network, Inc. (ACORN) immediately began making plans to license an Earth Station within one mile of the original site. PNI and ACORN sought to recreate an Earth Station with the same horizon to horizon protection as the original had and before terrestrial microwave and cellular towers could move into the void created by the decommissioning of the original Earth Station.
