

Dr. Donna D. Lenaghan

Donna Lenaghan's passion and career is creating environments for individuals and institution to learn and achieve. Throughout her career, she has successfully lead technology, professional development, team building, and strategic planning initiatives for dozens of educational institutions, non-profit, profit and governmental organizations. For the last fifteen years, she has answered the call "Take our school to the next level with technology" and helped over twenty schools and universities with comprehensive technology start-ups or reengineering projects, help desk transformations, and/or curricula and professional development initiatives for technology integration. With a doctorate in Adult Education, masters in management and community development, human resource development, educational technology and numerous technical certifications, she works collaboratively with clients to adapt business and technical best practices to its unique environment.

Dr. Lenaghan presented workshops on brain-based learning, educational technology, and information technology globally at the University of Beijing, University of Frankfurt, Dublin City University, Rand Afrikaans University of Johannesburg, Universidad Autonoma de Santo Domingo, World Futures Society Conferences, the World Conference on Health Education, ISTE, and FETC. She authored numerous articles for professional print and e-based publications, as well as produced video and related workshop education materials. She knows the inputs, outputs and in-betweens of corporate cultures, strategic planning, teaching for learning, information technology (IT) and educational technology (ET).
