## about us

**Total Utility Connections offer a complete personalised service that provides for and guides our customers through the often confusing and challenging utility connections market.**

As we are completely independent we are able to offer solutions on all utility aspects that work best for you, the customer.

Our goal is to be recognized as the most progressive enterprise in the utility connections industry, providing our customers with solutions to all their energy requirements.

Our unique vision will allow us to offer a timely, competitive solution that is focused solely on delivering a greater user experience of across all aspects of the utility connections market.

## our values

Our people make our company and we have gathered a group of experts in their field with a sole focus on providing the best service possible.

Innovation is at our core and we're always looking for new ways to work in order that the service we provide is the best it can be.

We are committed to all our customers, from first contact through to the final meter fit. We pride ourselves on the quality of our service delivery and strive to give the best all round value for money.

# commercial

We pride ourselves on being experts in commercial connections, and whatever your requirements we'll have the knowledge and a solution to deliver great value and service.

We'll provide you with an experienced team of qualified technicians and project managers who'll coordinate the job from initial enquiry to final meter fit, and what's more, our clients enjoy the backup of a dedicated account manager.

## domestic

With extensive experience in the domestic market we realise the need for great value and superb service.

We will design and install the network considering your needs, and as we are completely independent of any network owners, we'll find the adopting network owner that works best for your development.

Whatever the size of your development, we'll provide you with solutions that work best for you through honest advice, clear pricing and superior service.

# metering

We cater for all aspects of gas metering from small to large and simple to complex, in both commercial and domestic environments.

We are able to offer our customers a complete gas installation so you don't need a third party metering company to complete a new connection.

Our complete offering doesn't stop with new installations, we are also able to perform the removal of meters as part of a service disconnection.

# SMART metering

Effective energy management depends on up-to-date information, yet many households and businesses still lack a clear understanding of their energy consumption. That's where SMART metering comes in.

Energy suppliers will be able to offer a wider range of services and tariffs to manage their customer relationships more effectively.

We can provide you with a SMART metering cost in our proposal, so you have choice at an early stage.
