

DR. RUTH POTEE, YOUTH, OPIOIDS & RX DRUGS

Dr. Ruth Potee, a well-known physician, board-certified in Family Medicine and Addiction Medicine will speak on the vulnerabilities of youth and addiction, prevention strategies, the connection of athletes and sports injuries to potential misuse, and other home/family/community considerations about access to these harmful substances.

Across the country and in our state, communities struggle with how to help battle the current opioid and Rx drug epidemic. Working together, we have an opportunity to better understand this complex issue in Bristol County, and be part of the solution helping to tackle this lifelong danger.
