American Cyber Ranks No. 15 in Washington Technology's Fast 50 With Compound Annual Growth Rate of 91.79%

Clifton, VA, September 22, 2016—American Cyber is pleased to announce that the company has been awarded a ranking of #15 on Washington Technology's list of fastest growing local private companies for 2016. Honorees for the Fast 50 list must be a Government-qualified small business, and are selected and ranked by their compound annual growth rate from 2011 through 2015.

In an article addressing the new list of Washington Technology honorees, Nick Wakeman, Editor-in-Chief of Washington Technology, stated: "Besides the various small business categories represented on the Fast 50, the companies also represent a wide range of capabilities. The companies are value-added resellers, consultants, professional services and IT services firms. Some of the projects they support include data centers, cybersecurity, training, data analytics and cloud computing. Many are trying to bring innovative solutions to their government customers." American Cyber President, Gary Winkler, also added: "We are very pleasantly surprised at our #15 ranking, especially among such other great companies. It is an honor to serve the Federal IT and Cyber community, and we hope to continue providing great service and capabilities to our customers far into the future. A special thanks go out to all of our mentors, partners and teammates for making this possible."

About American Cyber

American Cyber, Inc., specializing in C4ISR and Cyber solutions and services for the Government, has decades of experience leading transformational initiatives supporting National Security missions. We identify and implement preeminent, integrated technology solutions for the Government based upon our specialized knowledge of C4ISR and cyber requirements and technologies, and our unique insight into the needs and processes of the U.S. Government and Department of Defense. Our ability to solve any challenge from network gateways to the end-users, including mobile devices, allows American Cyber to offer Solutions with Velocity. We have built partnerships in Government, industry, and academia to

provide robust, innovative and cost-effective solutions and services for national security missions. We have extensive experience providing direct support to the Federal Government.
