

Region 8 February 2018 Update Submitted by Penny DeNoble

Monroe – Just had a webinar with the Southern Education Center for [DR1] National Black Testing talking about HIV from 1980's to 2018 and challenges on getting people to get into testing and into treatment and did testing on that day as well. They are now collaborating with the Children Coalition along with the Dept of Health in getting a Teen website to educate teens about HIV and getting a program in the schools in their area.
