

# illuminating All-in-One Coating Kits

**Paint your tools and equipment  
to glow in the dark and illuminate  
your surroundings with Foxfire  
Illuminating All-in-One Coating Kits**

**Retail Price  
\$179.99**

### Highlights:

- Paint tools and equipment to increase visibility and positional orientation
- Can be charged by any light source (sun, artificial light, low light)
- Will illuminate surroundings for hours when fully charged
- May be recharged repeatedly by any light condition
- Glow/illumination serves as a "light emitter"
- Energy efficient, eco-friendly and no batteries required
- Can withstand high temperatures
- Each kit contains a two-part industrial grade epoxy, primer, mixing and applications tools
- Contains enough product to coat a hydrant (bonnet, caps and curb), several tool handles, air bottle or ladder tip

### Do It Yourself Uses:

- |             |                      |           |               |
|-------------|----------------------|-----------|---------------|
| • Tools     | • Hoze Nozzles       | • Stairs  | • Ladders     |
| • Helmets   | • Fire Extinguishers | • Doors   | • Door Wedges |
| • Couplings | • Hydrants           | • Lockers | • Spanners    |

Three of the biggest risks faced by firefighters are disorientation, visibility and accountability (to both individuals and tools). The

The Foxfire® All-in-One Coating Kit assists firefighters in facing these risks by improving positional orientation, making both tools and personnel easy to locate and illuminating search areas. Foxfire products utilize advanced photoluminescent technology.

*"The Foxfire illuminating glow paint is incredible. We've applied it to axes, hooks, halligan bars and have tested it on a fire hydrant. Foxfire has the potential to change the future of firefighting as far as accountability and safety of our crews and keeping tabs on our tools in zero light conditions."*
