

Illuminating Epoxy Delivery System

Integrate photoluminescence into your firefighting operations with Foxfire's Illuminating Epoxy Delivery System. Perfect for illuminating ladders, floors, railings, apparatus features and more.

Highlights:

- Paint ladders, equipment, floors, stairs and more to increase visibility and positional orientation

- Utilizes Foxfire's Advanced Photoluminescent Technology®
- Easy application, uses any standard caulk gun to apply
- Tube may be used at different times, simply use new mixing tip
- May be used/walked on in 24 hours
- Can be charged by any light source (sun, artificial light, low light)
- Will illuminate surroundings for hours when fully charged
- May be recharged indefinitely
- Glow/illumination serves as a "light emitter"
- Non-toxic
- Can withstand high temperatures

**Retail Price
\$470.99**

*(One tube coats between
600-800 linear inches)*

The Foxfire Illuminating Epoxy Delivery System enables firefighters to illuminate apparatus, floors, ladders and more. With Foxfire, you'll be assisting firefighters in facing the risks of disorientation, visibility and accountability and you'll also be leading the way to safety.

Potential Uses:

- Ladder rungs
- Fire boats
- Apparatus enhancements
- Handrails
- Flooring/pathways
