

illuminating Grip Wrap

Identify your crew and equipment with illuminating grip wrap. Enables your tools are more to illuminate in the dark.

Highlights:

- Can be charged by any light source (sun, artificial light, low light)
- Will illuminate surroundings for several hours when fully charged
- May be recharged repeatedly
- Glow/illumination serves as a "light emitter"
- Energy efficient, eco-friendly and no batteries required
- Heavy duty, made of industrial grade reinforced silicone
- Each roll is approx. 55" which is enough for the center of a large halligan, 6' New York hook or two axe handles.
- May be secured in place by wrapping duct tape, electrical tape, zip tie etc on end to keep it from unraveling. Does not have adhesive so it can be re-used.
- Unique surface clings to itself and allows grip on wet or dry tools with or without gloves
- Can withstand high temperatures
- Yellow color glows green

Three of the biggest risks faced by firefighters are disorientation, visibility and accountability (to both individuals and tools). Foxfire® illuminating grip wrap assists firefighters in facing these risks by improving positional orientation, making both tools and personnel easy to locate and illuminating search areas.

"The grip wrap offers a lot of flexibility as it can be used and reused on many different types of tools including those with wood and fiberglass handles. I have the tape wrapped around my 4-foot roof hook and have used it on multiple fires and during training burns. Everyone is amazed how much it glows and the grip it adds to the tools."
