

Doctors Direct LLC

Simple. Direct. Access.

Our practice makes sense for everybody! If you are insured, uninsured, medicare or otherwise we are happy to see you in our enjoyable laid back environment. Consistent with a direct pay model we do not require insurance, but payment for the services rendered are collected the day of service in our office. If you have insurance we still will utilize this to secure labs, obtain prior authorizations, images, and procedures amongst other things on your behalf. Large deductibles make this way appealing not only from cost savings we can provide at our point of service, but we also have worked with a number of other facilities to secure the most cost effective manner to care for you (images, biopsies, labs etc). We will cost a fraction of the traditional fees of healthcare while affording you standard of care. If you are uninsured: that does not affect us at all either. Our goal is affordably taking care of our community's mind, body and spirit... and we feel we have been doing this very well.

In order to be a part of our level of service we have an annual access fee. You will get incomparable communication and personalized care with your physician directly. Not to mention additional savings on in office labs, studies, and procedures when compared to non-patients. We will save you far more money on your prescriptions and workups than you would ever imagine by making smart decisions that optimize your dollar value. We are not the traditional medical clinic and shouldn't be compared to any either. The fee for our service will be buried in your first office visit of "your year of care." You get all of the benefits above and more for a fee of \$125 for the year. If you are a couple / family that file taxes with the family members as tax dependents; then the fee is only \$200 for all dependents and their parents living in the same residential address. Family fees do not apply to adults living in separate residences. The \$125 for the first family member is assessed at their visit and then whenever the additional family member comes a fee of only \$75 is charged (for a total of \$200). This fee starts the month of your first visit and is due the first of the same month the next calendar year. We want you to be an active part of your healthcare. Get VIP care at an affordable fee.

Family = Spouses (Significant Others living together) and their children whom can be claimed on their tax documents and living permanently in their same household - street address.***This does not cover extended family members, siblings, aunts/uncles, grandmother nor grandfathers etc....
