

# Beauty Protégés

## AFTER CARE

Please consult with your Microblading Specialist  
of any difficulties

Form by Jenny Vu

**The next 7 days:** Do not wash, tug or scrub the eyebrows. It is recommended to wash your face with a face cloth in order to avoid the area successfully.

Before showering apply a layer of coconut oil to protect your eyebrows from moisture. During the shower keep your face away from the showerhead.

Frequently apply coconut oil (4 – 5 times a day) to keep the area moist, this will help the scabbing from itching and peeling off the pigment.

### What to expect after procedure

The pigment will appear very sharp and dark after the procedure. This is because the pigment is still sitting on top of your skin, and is not yet settled in completely. The color of the pigment will soften gradually. Do not be alarmed if you see some pigment on the cotton swab, as this is excess pigment and/or body fluid naturally exiting your skin.

Once the healing of the skin starts, it will resemble dandruff flakes or dry skin. This might give you the impression that the color pigment is fading quickly however, this is superficial color and natural dry skin being removed from your eyebrows.

The healing of deeper wounds might last between **14-21 days**. Touch-ups and/or correction is recommended only after this period.

You can now enjoy your new beautiful eyebrows!

### Avoid for 7 days post- procedure:

- Practicing sports (heavy sweating)
- Swimming, Hot sauna, hot bath, or Jacuzzi
- Sun tanning or salon tanning
- Any laser or chemical treatments & peelings, Any creams containing RetinA or Glycolic Acid on the face or neck
- Picking, peeling, or scratching of the micro pigmented area in order to avoid scarring of the area or removal of the pigment
- Performing tasks related where there is a lot of airborne debris
- Drinking alcohol in excess, as it may lead to slower healing
- Touching of the eyebrow area except for when rinsing and applying the post-care cream with a cotton swab
