

OUR DOCTORS

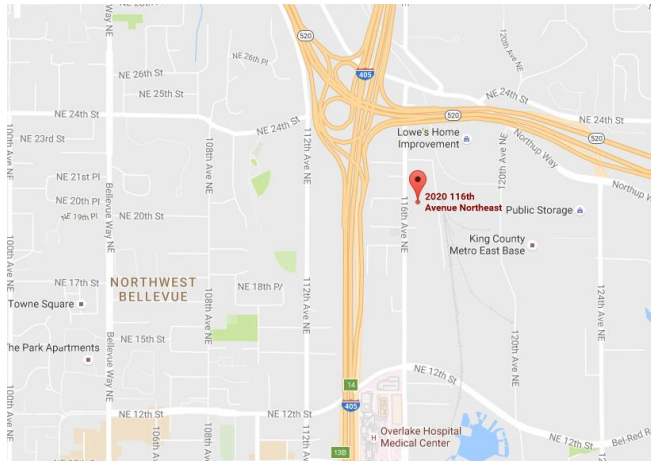

Dr. Roopa Bhat, MD, PhD, is a board-certified neurologist who developed an affinity for the Pacific Northwest while doing an Internal Medicine Internship in Providence Medical Center in Portland, OR. She then trained in Neurology at Stanford Hospital in Stanford, CA. She completed her residency in Neurology and translational fellowship in Multiple Sclerosis and Neuroimmunology Research at Stanford. After that, she served as faculty there, supervising the neurology clinics of Neurology residents and winning teaching award from the Stanford medical students. She has published articles and authored chapters in top journals including the Proceedings of the National Academy of Sciences, Multiple Sclerosis, Neuron, Nature medicine and the Tarascon Clinical Neurology Pocketbook.

After her years in California, Dr. Bhat returned to the Pacific Northwest in 2013 to practice in Washington. She remains a firm believer in education. She frequently gives educational patient talks and spends time during a patient's visit to explain the mechanism of neurologic dysfunction and how treatments may be working.

OUR MISSION

At Bellevue Neurology and Neuroscience, our mission is to provide neurologic care based on compassionate, thorough listening, and partnering with patients in decision-making for the prevention and treatment of symptoms. We incorporate the latest technology and guidelines in our care.

And others...

CARE PLAN AND SERVICES

We use common neurologic tests including MRI, electroencephalogram (EEG), Electromyogram including nerve conduction study (EMG), Evoked potentials, Cerebral spinal fluid analysis (Spinal Tap or Lumbar Puncture), if needed, for diagnosis.

We provide a tailored care plan and offer a full range of treatment including botulinum toxin treatment for migraine and other conditions, nerve blocks, and have a referral network for other services as needed. Dr. Bhat is privileged to provide care to her patients while admitted to Overlake Hospital should the need arise.

Laboratory services are available on site.
