*"What is Thai food? Every country in the world has its own food profile. It reflects its culture, enviroment, ingenuity and values. In the case of Thailand, these words come to mind; intricacy; attention to detail; texture; colour; taste; and the use of ingredients with medicinal benefits, as well as good flavour.*

*We not only pay attention to how a dish tastes: we are also concerned about how it looks, how it smells, and how it fits in with the rest of the meal. We think of all parts of the meal as a whole - sum rap Thai (the way Thais eat), is the term we use for the unique components that make up a characteristically Thai meal."*
