

Certificate of
Emissions Test Validation

the center for emissions research and analysis has conducted laboratory emissions testing of one sample of a moli-tron air scrubber of the series asfw: which has demonstrated an emissions factor of 0.002 lb of pm per lb of hamburger meat and an emission factor of 0.005 lb of ROG per lb of hamburger meat in accordance with the south coast air quality management district's (scaqmd) interim protocol for scaqmd rule 1138 dated July 29, 1991.

this emissions data is a valid representation of the emissions from the model tested. results should be replicable from manufactured models to the extent models offered for sale to the public are identical to the model tested.

equipment tested:

make: moli-tron enviro-clean
air scrubber

model: asfw-2250

cooking device: nieco model no. 850

production rate: 75 lb/hr

this emissions validation certificate is issued
this 24th day of June 1993.
