

# Σ C L Σ C T Φ C Δ

*Created by Vishal Dhileepan and Dilip Parameswaran. Special thanks to Madhumathi Narayanan.*

## *Rules*

*The game is essentially played in two stages:*

### *1. Deciphering of Clues*

*In each card, there are three or four clues. You solve the clues to get words. The number of letters in each word is displayed in brackets.*

### *2. Rearrangement and Identification of Answer*

*The words you found in the first stage can be phonetically rearranged and combined to form a new word – the answer.*

There are many ways to play Eclectica. Here are two of them:

Form two or three teams (or work individually).

Method 1:

Work simultaneously; the team that identifies the answer first gets the point.

Method 2:

Teams take turns to draw a card and identify the answer within 90 seconds (use the sand timer).

Teams lose a point for not identifying the answer in time.

Methods 3 - ∞:

You can come up with new, creative ways to play Eclectica! (Or check [www.eclecticagame.rocks](http://www.eclecticagame.rocks))
