The Gold Bug Electrolytic Recovery System

Volts – 110/220/1Ph/60Hz

Max Output Current – 25 Amps D/C

Optimum Output Voltage – 2.5-4.0 Volts 6 Volts Max

Max Solution Temperature – 125°F

Operating Ph – 1-14 possible (at Ph below 2 certain precautions must be taken) 3.5-9.5 optimum

Collection Canister Dimensions – 15" long/5 ½" O.D.

Applicable Solutions

- Drag-out solutions of gold, silver, rhodium, platinum and palladium plating baths
- Cyanide based gold and silver
- Gold strike
- Cyanide based gold strippers
