

Quemetco, Inc. is seeking an **Environmental Manager**. Quemetco is a privately held secondary lead smelting company that operates lead acid battery recycling facilities in California, Indiana, and New York. We use state of the art technology and a highly trained workforce to ensure the lead acid batteries we recycle into refined lead do not harm the environment, employees, or the communities in which we work. The reclamation of junk scrap batteries is a true environmental success story.

This is a highly regulated industry therefore the Environmental Manager must be a Subject Matter Expert in federal, state and local regulations concerning land, air and water:

- Recommends and enforces compliance with standards
- Participates in all plant environmental audits and inspections
- Manages air sampling and monitoring programs
- Manages all required checklist, inspections, and required tasks associated with plant permits and standards
- Prepares compliance reports

The ideal candidate will possess:

- BA/Chemical Engineering or Environmental Engineering
- 5-7 years Environmental Experience
- 5-7 years Supervisory Experience
- Class "B" Wastewater Treatment Operator Certificate
- Practical application of ISO 14001 EMS

Full Benefits package including Pension and 401(k) plan
