

FOR PEDIATRIC PATIENTS AGES 4-11 YEARS

1. The back-scratch only.
 - a. The testing will be done in two separate visits.
 - b. Testing occurs while the child is on his/her stomach.
 - c. It is required that the child be as still as possible during the twenty minute waiting period, due to the droplets being left on the child's back.
 - d. This feels like a pokey brush/comb being lightly pressed on the back.
 - e. The foods in our panel will be tested on the first visit, there are 48.
 - f. The environmental panel will be tested on the second visit, there are 48.
 - g. Little red dots will be present on the back due to the scratch, however, only for a little while.
2. Please bring something to entertain the child while on their stomach for the twenty minute waiting period.
3. A little "travel pillow" has been helpful to rest the head.
