For the Personal and Urgent Attention of: Gavin Patterson, Chief Executive Officer of British Telecom

CC Silvia Fernández de Gurmendi, President of The International Criminal Court

Dear Gavin

This is a DEMAND Notice not a letter.

I note that we have to date received no response to our question on "what is the safe level of EMF emissions in order to ensure that no harm may be brought to peoples DNA and in the specific case of young girls who have limited or no immune defence to radiation, their ovary follicles? In case you are being misinformed internally, **it is sub 3.5kw/sqm and your masts are alleged to be emitting up to x300 +/- times that amount.**

Please read and digest the below information then review your financial operational mandates in line with the duty of care to the public. You have fair warning that if you do not immediately turn off or remove the mast from liphook Post Office site and that of the EE mast in Bohunt school then your actions and those of your companies will ultimately be found indictable by the International Criminal Court.

On 31/10/2017 18:41, Paul Michaels wrote:

Dearest Marie

THANK YOU! My whole family is sick too often, as are other locals. There are far too many still births and miscarriages and cancer cases that 'may' be linked to Wireless communications in our homes and in the streets. The crocuses, Fruit trees in fact all trees, are confused about the seasons, and our doves, struggle to fly home some evenings. Our Immune systems are fragile and brains are fried.

The EE mast placed in Bohunt MANOR school is mind boggling. We can't look back we have to work together learn from our mistake and bring change for the better. The future? that we can change, together with a new openness love truth and clarity. With that comes trust and out of trust comes loyalty and sustainable profit.

IMAGINE the power of a CEO of a huge Corporation like BT, making a public apology/announcement informing its customers of immediate change because of public health concerns, IMAGINE the power of Gavin playing guardian of the public at the cost of profit,

IMAGINE an open door policy on the public scrutiny of the light speed transformation to limit any further potential risk

IMAGINE the love for Gavin to be so bold as to make a You tube video like Coca Cola has just done, saying "SORRY!" <https://www.youtube.com/watch?v=bHhCP5ad-zM>

IMAGINE Gavin as the most popular CEO in Britain today because he made the boldest decision to stand up to criticism and channel any negative vibrations to positive vibrations and to help those that can't.

IMAGINE, IMAGINE.

I do hope that this is the start of action from BT to do its own bit to change the world and save us, our children and our childrens children.

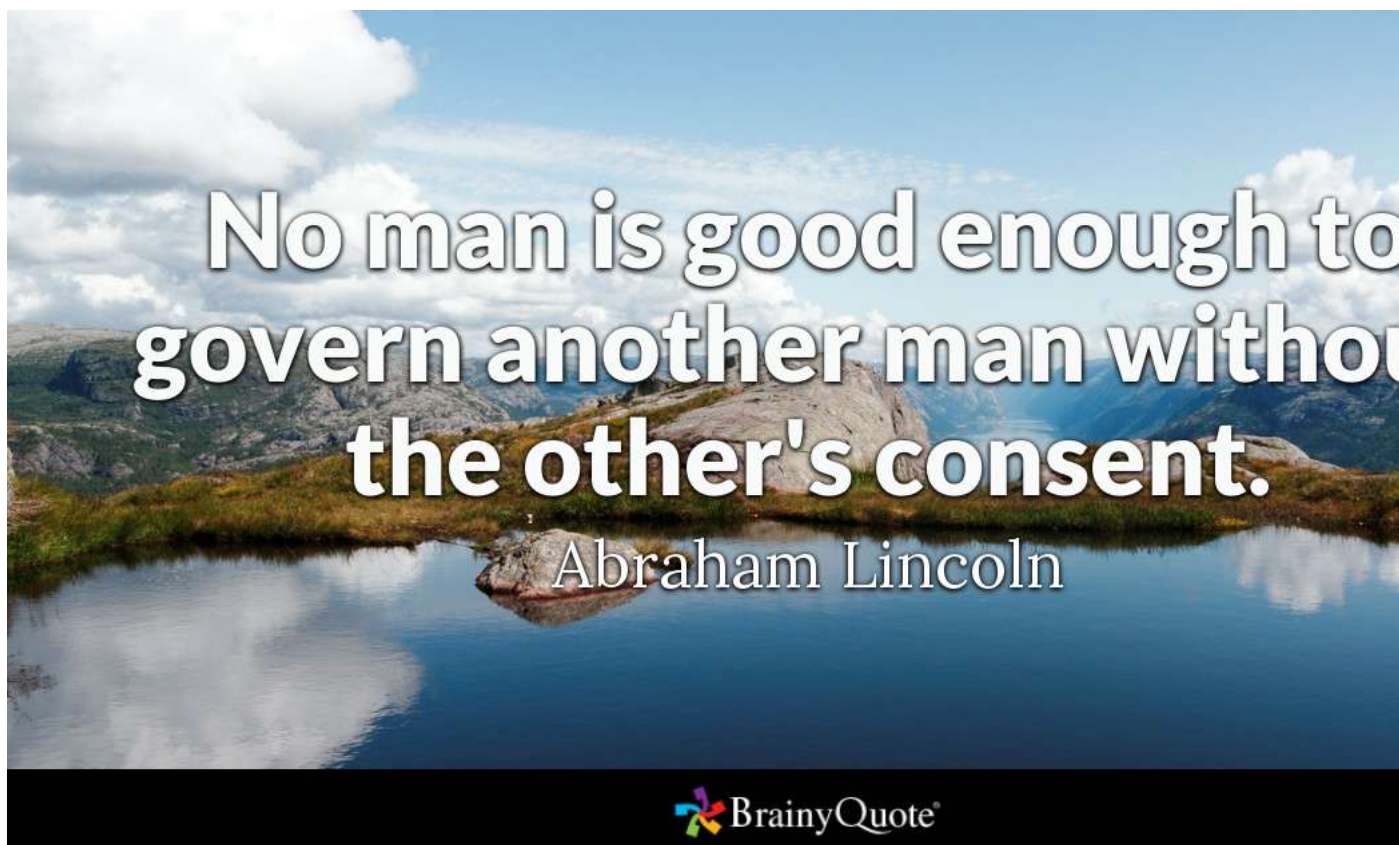

I realise that this could be way out of the scope understanding or knowledge of Gavin but now that he is aware Gavin has a 'Duty of Care' to immediately send a task force out to the mast in Liphook (In fact all Masts) and take some accurate readings, and take action (turn them down or off).

The publics response from Phone masts and the biological effects of 5G and Smart Meters is truly staggering and to be heard by the World Court.

THANK YOU, THANK YOU!

In GOD we pray in GOD we trust X

Kind regards

> <<https://mail.google.com/mail/u/0/images/cleardot.gif>>

> Dear Mr Michaels,

> Public Health England (PHE) advises the UK Government on the public health aspects of exposure to radio waves, including those from mobile phone base stations and other radio transmitters in the environment. PHE's advice on exposure of people to radio waves from mobile phone transmitters is available in the following link:

> <https://www.gov.uk/government/publications/mobile-phone-base-stations-radio-waves-and-health/mobile-phone-base-stations-radio-waves-and-health> <<https://www.gov.uk/government/publications/mobile-phone-base-stations-radio-waves-and-health/mobile-phone-base-stations-radio-waves-and-health>>

> In brief, PHE recommends the guidelines of the International Commission on Non-Ionizing Radiation Protection (ICNIRP), which form the basis of public health protection in the UK and in many other countries. The ICNIRP exposure guidelines are developed from comprehensive reviews covering the broad base of the scientific evidence and are based on the avoidance of all known adverse effects of exposure to EMFs at frequencies up to 300 GHz (gigahertz). The World Health Organisation (WHO) acknowledges that ICNIRP guidelines are based on a careful analysis of all scientific literature and offer protection against all identified hazards of RF energy with large safety margins:

> <http://www.icnirp.org/cms/upload/publications/ICNIRPemfgdl.pdf> <<http://www.icnirp.org/cms/upload/publications/ICNIRPemfgdl.pdf>>

> The potential health effects of exposure to radio waves from environmental radio transmitters have been extensively researched. PHE's position is there is no convincing evidence that radio wave exposures below ICNIRP guideline levels cause health effects in adults or children. Many measurements have been made of exposures at publicly accessible locations around environmental radio transmitters and the results have been well within exposure guideline levels. An expert group report commissioned by one of PHE's precursor organisations (the 2012 AGNIR report) gives further information about the health-related studies that have been done and the exposure measurements that have been made:

> <https://www.gov.uk/government/publications/radiofrequency-electromagnetic-fields-health-effects> <<https://www.gov.uk/government/publications/radiofrequency-electromagnetic-fields-health-effects>>

> The key point is that the mobile phone network operators are committed to ensuring that all sites comply with the guidelines of ICNIRP, which form the basis for PHE advice:

> <http://www.mobileuk.org/codes-of-practice.html> <<http://www.mobileuk.org/codes-of-practice.html>>

> PHE does not offer an EMF measurement service to the general public because the EMF levels fall well below the recommended guidelines. Many measurements have been made in and around residential properties and these have consistently been well below the levels where known health effects can occur.

Subject: WIFI Smartphones and Smartmeters are microwaving our children's Ovaries, and causing other long term health issues Cognitive disorders like dementia and Alzheimer's disease.

To: adminoffice@liphook-inf.hants.sch.uk <<mailto:adminoffice@liphook-inf.hants.sch.uk>>

Dear Jackie. & Greg

The very real dangers of young children being exposed to wifi have been revealed. It is microwaving us and more. Importantly our children. More disturbingly it is silently killing their kids. Clandestine. Population control? I don't want to engage in conspiracy, however as a responsible parent and friend I owe it to you and to humanity to provide Intel as it is passed to me. The government has recently slammed on the brakes of a £12bn roll out of smart meters due to serious and proven health issues, and potential compensation claims.

The first video will shock you to the core.

<https://www.youtube.com/watch?v=VbCwdjllnqo&app=desktop> <<https://www.youtube.com/watch?v=VbCwdjllnqo&app=desktop>>

As I discussed with you Greg, I am not part of a campaign group and would very much appreciate it, if you and your staff treat this and other information, with the utmost confidentiality. Act on and share it where you think appropriate, but know that my source is of a very high level which is imposing change on the world as we speak, and for the better.

Wifi is the silent killer, put the Lobster in boiling water and it may jump out. Put it in cold water and increased true heat slowly and it will cook/die slowly and quietly. 2G 3G 4G and now the killer blow 5G which every body demands as they want faster and faster communication. "But it is what. People wanted" No, they sold it to us!

I will give you more information as it is given to me, however should you wish to discuss in person I am happy to attend a meeting at your convenience, where I will substantiate my involvement with the imminent role out of life and lifestyle changes, designed to heal our planet.

Footnote - Richard Branson was on Necker Island when the full force of the Hurricane destroyed his house and paradise island. He has said that it will cost billions of dollars to rebuild the BVI. He also said that money should be better spent on providing clean energy, energy such as TESLA and tidal energy. Nikola Tesla died after trying to promote his plans for free and clean energy. To this day his one hometown uses his patented motors to provide Free and clean energy
