Important Events & Reminders

➤ July 3 – July 7 No School

Registration for the Fall After School Enrichment Program is OPEN; find out more & register now [online](#) before 8/4/2017!

Our Learning

Mandarin: [1st Grade] We were taught the following lessons “他是谁? (Who is he?)” and “我家有四口人。There are four people in my family.” where we learned how to introduce family members. We also learned the Mandarin word for country and practiced the names of four different countries along with learning the different flags.

[3rd & 4th Grade] We made sentences in Mandarin that dealt with the new grades that we will enter in the Fall and continued to work on our language fluency. We took the YCT Level 2 pretest and did very well. Next week the teacher will begin at YCT Level 3.

Math: [1st Grade] We continued our learning on money and focused this week on how to add and subtract amounts. For example, two quarters equals fifty cents.

[3rd & 4th Grade] We continued our economic team building game. This week we focused on buying stocks.

Science: [All Grades] We built catapults and learned how useful they are to launch something from point A to B. We also learned that great structures begin with a solid foundation and made our own Popsicle stick houses.

Cultural Experiences/Art: We continued Calligraphy and practiced Chinese Watercolor painting.
