➤ **Oct 19 & Oct 20** No School

Registration for the Spring **After School Enrichment** Program is **OPEN**; register early [online](#) before 11/17/2017 & Pay No Registration Fee!

Our Learning

Mandarin: Our reinforcement of learning the Chinese language is off to a fantastic start! We practiced key mandarin words assigned to each student making sure all would be prepared for their weekly Chinese spelling tests. We also worked on building fluency in the Chinese language with all students by primarily communicating in the target language.

Math: We focused on differentiated learning where math topics introduced by the student's homeroom teacher, at their respected schools, is reinforced to ensure that students understand the primary concepts.

Science: Science is off to a great start. Students have done several experiments related to Chemistry and Physics. Some home runs that excited all of the children included milk art, creating slime, making homemade lava lamps, learning how rain clouds form and much more.

Cultural Experiences/Art: We created lanterns, worked on our Chinese Calligraphy and typically play games that exposes students to the Chinese Culture.
