Company Description:

Alpha Q, Inc. (AQI) is an industry leader in the precision machining, manufacture, assembly, and test of aerospace alloy components. Using advanced state-of-the-art equipment and manufacturing practices, we have built our reputation on providing on-time delivery, cost competitiveness, and exceptional quality for all the products and services we sell. We specialize in the machining and assembly of highly complex components and alloys which differentiates AQI as a uniquely positioned facility producing components including housings, gear boxes, compressor cases, engine frames and other complementary components.
