Submitter Information:

Today's Date:
Name:
Address:
Bird Type:
Bird Name/ID:
Phone Number:
E-Mail Address:

Owner Information: (if different than submitter)

Name:	
Address:	
City, State & Zip Code:	
E-mail Address:	
Bird Type:	
Bird Name/ID:	
Please send preliminary results and the certificate directly to the owner using the above information.	

Results within 1 week.

Please Note: In the event that a submitted sample does not contain sufficient DNA for processing Exotic Bird Mart will test another sample from the same bird at no charge. Refunds or credits will not be issued for samples with insufficient DNA. In no event shall Exotic Bird Mart be liable for incidental, consequential, special or other damages of any nature even if Exotic Bird Mart has been advised of the possibility of such damages.

Instructions for sample collection:

Blood: An easy alternative to clipping the toenail too short is to use a disposable lancet like diabetics use to check their blood sugar. Once the bird is secured, place the lancing device so that when it is deployed it will prick on the top of the foot or between the toes. If you can see a vein that is a great place to try. If the prick is successful, you will see a drop of blood. Blot the blood onto a Qtip and let it dry. At this point the bird should be fine and ready to be released. The sample is now ready to be submitted with a completed order form.

Eggshell: Let the shell dry completely, seal each shell in a separate container or bag (paper works best) and send it along with an order form.

Results are usually available one week after we get the sample. We can call or e-mail results or you are welcome to call us anytime.
