

Kittens and Puppies and Humans

Ed Marits from Mt Vernon · 12 Sep

2

So, I am asked frequently when I am transporting kittens or puppies: Can I hold one? I say NO and they look at me like I was from Pluto.

I try to explain the reasoning... To some it goes over their head, others argue with me about human and animal vectors, etc.

We never let them touch even the ground (NPOG) No Paws on Ground. All is because these animals are very susceptible to all kinds of potential diseases/infections/ et al. We always handle under gloved hand... and we constantly sanitize everything.

Second MINOR reason (happens very rarely)... A person snatches and runs with the animal... Yes, highway robbery...

So please understand why we refuse this wonderful solicitation.
