

BIOGRAPHICAL SKETCH

Mr. Christopher Findlay is currently the worldwide remarketed analytical instrument business manager for Agilent Technologies. Mr. Findlay earned his B.S. in Medical Technology from the State University of New York at Fredonia. Employed by FMC from 1981 until 1985, his primary area of responsibilities included pesticide residue research and later analytical method development for process chemistries. He joined Environmental Testing & Certification Corporation as a Senior Analyst in 1985 and shortly afterwards was promoted to Director of Chromatography. In 1987, he joined Accutest Laboratories and help them establish their environmental business as Manager of Chromatography. In 1988, Chris joined Hewlett Packard as a Customer Engineer where he was responsible for working with customers on their application and support needs. In 1995, he was promoted to management and developed HP/Agilent's return to manufacturer strategies for small footprint analytical instrumentation. In subsequent years, Chris has held various management positions for Customer Contact Centers, Inside Sales and was the North American Sales Manager for Consumables & Support Services prior to his current role.

Chris is an avid cyclist and is an instrument rated private pilot.
