12. Breedings bought through the BIF Auction are not sellable and must be used by the winning bidder.

## Online Proxy Bidding

1. When you place a bid, you enter the maximum amount you're willing to pay for the breeding. Other bidders won't know your maximum bid amount.

2. The auction places bids on your behalf in \$25 increments. The auction will bid as much as necessary to make sure that you remain the high bidder. The auction will keep bidding for you until bidding reaches your maximum amount.

3. If another bidder has placed the same bid before you or a higher maximum bid, the auction will let you know, via email, that you've been outbid so that you can place another bid if you want.

## Example:

- The current bid for a breeding is \$400.
- JoeShmoe is the high bidder. (JoeShmoe has placed a maximum bid of \$500 on the breeding, but his maximum bid is kept confidential from other bidders.)
- TedIsGreat views the breeding and decides to place a maximum bid of \$450.
- The auction bids for JoeShmoe so the new high bid is \$451 and JoeShmoe is still winning the auction.
- TedIsGreat then bids \$550 and becomes the high bidder because his bid is greater than JoeShmoe's bid. The new current bid will show \$551.00.
- JoeShmoe is sent an email that he has been outbid.
