

## **RESOURCES and LINKS:**

*“Confident that the actions will lead to a cornucopia of unanticipated innovative users and will generate tens of billions of dollars in economic activity and **that’s damned** important because it means that US companies will be the first out of the gate and that is why 5G is a national priority and stay out of the way of technological development. Unlike some countries we do not believe that we should spend the next couple of years studying what 5G should be or how it should operate the future.” - Tom Wheeler, Chairman of the FCC. You can view these comments and more by clicking on the link provided below under “FCC: intimidating press, suppressing science at “5G” announcement.”*

This includes avoiding all health concerns that are raised! Do you think that your health concern will be heard even if you have 110% proof that what happened was because of wireless radiation from your cellular device? The answer is loud and resounding NO! Your health before you even had your health damaged was already being suppressed and discredited by the “Telecommunication Act of 1996” where the telecommunications industry cannot be held liable at any cost to anything related to health or even death. In other words, if you get brain cancer from your wireless devices you cannot sue the manufacturer of the device, you cannot sue your wireless service provider, you cannot receive any compensation for your injuries whatsoever because of the “Telecommunications Act of 1996.”

On top of this, 5G roll-out is the mandate that everything must be micro-chipped. This includes humans, around 1,000 pages into Obama-Care it states that everyone will be **required** to have an electronic device implanted that only the Secretary of State controls what information is on this device. Do you want to be a government slave? Do you want to be a guinea pig to the wireless industry? Do you want to become educated? Then go to the links below and stand against the installations of towers, cell-sites, smart meters, etc... and take back your life from these industries. You are not alone! There are thousands of people globally who are standing up and saying “**NO!!!**” to this inhumane treatment by the wireless industry.
