## Canine Water Safety

This month Muddy Paws has put together a simple guide for Canine Water Safety. As the weather continues to get warmer, more of us are going to be visiting water centered locations in order to burn off our pet's energy while keeping them (and ourselves) cool! This guide goes over some of our favorite water safety supplies, as well as environmental warning signs, warning signs to look for in your pet, and a few location recommendations for enjoying the water. Check out this guide by clicking the button below, and stay safe this summer!

## Products of the Month!

ChuckIt! Amphibious Bumper - Amazon

This floating bumper toy is one of our favorites come summer time when we are spending more time enjoying the water! It's soft, but also durable, so it's perfect for protecting your dogs teeth while also lasting a long time. Having a floating toy

your dog's teeth from wearing down a long time. Having a floating toy rather than using sticks is important in avoiding mouth injuries!
