**An uplifting and perspective-filled
keynote talk for our down economy**

"Money Ain't Funny"

**How to Avoid the Traps that
Squelch Financial Dreams**

How do \$40,000 a year school teachers or \$18.00 an hour trade workers become financially independent when \$400,000 a year big-wigs file bankruptcy every day?

Logically, the answers are simple... until our emotions, attitudes and worldly influences on money creep in.

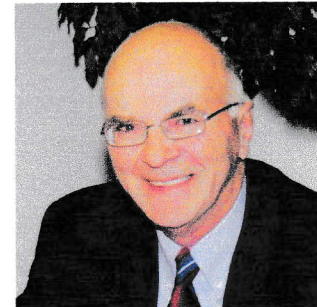

In this fun and inspiring talk, George will help your audience keep these "money traps" in check with simple and proven answers... straight from God's Book.

They'll laugh and learn how to side-step the subtle and stealthy money traps that force too many hard-working Americans to drown in debt, delay their retirement goals, work at jobs they hate, and tap their investment assets to pay the bills.

Money AIN'T funny in God's eyes. And after this talk your attendees will know how to view money through HIS eyes more often... and live a much more content financial life.
