

Match Computers to Users

Preparing for User and Computer Migrations are never easy. They are a logistical challenge even for the most organised of companies and organisations. Getting the most current information is key to a successful User migration and Computer move.

Gather the Computers information when a user logs into Active Directory.

Gathering the Computers IP address and user logon details accelerating identification Computers, users and where they are operating from.

Proven toolset

Developed and proven in the real world, ensuring your User migration and Computer Move activities complete with accuracy.

This tool will greatly assist in the migration planning and batching of geographical locations.

Capabilities

As users logon to Active Directory the information is passed to a centralised location. This can then be used to plan

- **Gather most recent information** to ensure you have the correct Computer to User information including their login name and computer IP

address which can then be matched to office Location to help in migration planning

- **View information in Active Directory** by enabling functionality in the Due-diligence PowerShell Tool.
- **Gather the history** of users who have logged onto the Computer capturing who needs to be migrated with the Computer
- **Identify those who simply close the lid of their laptop** by checking the daily reports you can identify who is not logging on and off regularly to your Active Directory environment
- **Use the information to contact users** to make sure you have up-to-date and accurate user information in preparation for Migration planning
- **Reduce overhead** in matching Computers to users, this tool will do it for you.

Benefits

- Correctly identify Computers and the Users logging onto them
- Updates and changes show in Active Directory and the Due-diligence reports
- Simplifies the unknowns in planning Migrations or just simply “who is using which device and where is it?”
- Leverages and enhances Microsoft Migration batch CmdLets
- Identify the “holes” of Computers to User information
- Assists in your Migration planning with accuracy

About Merger IT

Merger IT helps customers with solutions to assisting their organisations, providing the innovation of products which will enhance M&A activities delivery, and provide outcomes, through tried and tested toolsets and processes.

This ensures customers' requirements and outcomes are expedited leveraging the experience provided by Merger IT.
