

## Pre-Migration checks

Streamline your Migration of Users and Computers when using Quest Migration products. This tool will perform the pre-migration checks and create collection data for Quest Migration Manager and Quest Resource Update Manager.

A smooth Migration process will ensure the project will complete faster and on time. With the Pre-migration checks, will ensure the User account is current and that the Computer is available at the time they are expecting to be Migrated.

### Proven toolset

Developed and proven in the real world, ensuring your User migration and Computer Move activities complete with accuracy.

This tool will ensure the Quest Migration Manager and Resource Update Manager work seamlessly together.

### Capabilities

Plan and complete migrations when you have scheduled with your team and the end Users.

- **Check User Accounts are valid** by automating user account checks validating you have the correct user account

- **Check Computer Account and Computer availability** to ensure the computer can be contacted by the Resource Update Manager agent for the computer move
- **Reporting** any errors which will slow down Migration activities before configuring Quest Migration Manager and Resource Update Manager
- **Creates Collections for Quest Tools** using the success information from the pre-checks, making Migration tasks smooth and succinct.
- **Ensures ZeroIMPACT** to users achieving a smooth transition as part of your Migration or Consolidation
- **Minimise Risk** cost and complexity associated with migration and consolidation projects, while ensuring seamless coexistence and easier platform management.

### Benefits

- Quickly creates a succinct Migration process
- Ensures Users are Migrated and their Computers are Moved together, getting users operational quickly
- Removes error in creating collections in Collections in the Quest Tools of Quest Migration Manager and Resource Update Manager.
- Enables faster re-scheduling if a user and their computer are not available, using output from checks, pre-emptively enabling the project to keep on track
- Simple to use

### About Merger IT

Merger IT helps customers with solutions to assisting their organisations, providing the innovation of products which will enhance M&A activities delivery, and provide outcomes, through tried and tested toolsets and processes.

This ensures customers' requirements and outcomes are expedited leveraging the experience provided by Merger IT.
