ENABLING STABLE IT FOR BUSINESS GROWTH

Quest®

On Demand Migration for Email

Fast, reliable Office 365 and Exchange migration with zero footprint

With the increasing popularity of Microsoft Office 365, many organizations are looking to migrate from their on-premises environments to Office 365 to take advantage of the functionality and convenience the platform offers. Others have already moved to the cloud but want to migrate to Office 365. In either case, what's needed is a fast and secure migration solution.

Quest® On Demand Migration for Email securely migrates to on-premises and cloud-based email platforms without requiring software installation or maintenance. From a single console, administrators can migrate multiple users simultaneously and move data such as email, contacts, calendars and folders in

a phased approach. The solution even helps remove unwanted data during the migration process, shortening the time it takes to complete the move.
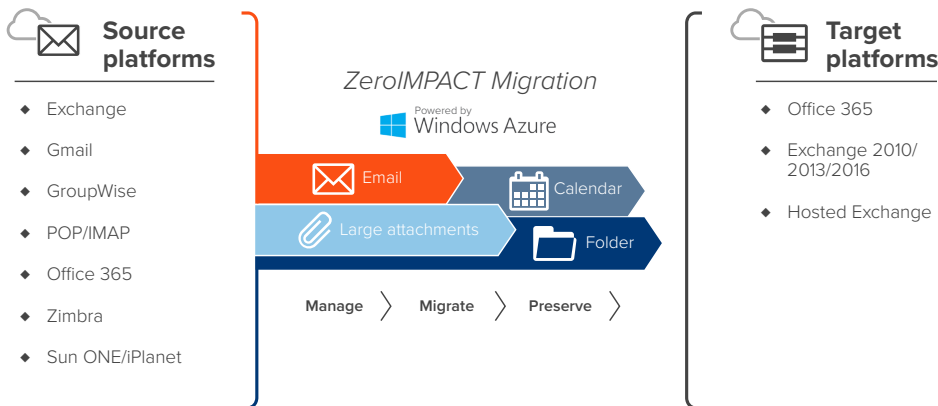

This solution is built on the Microsoft Azure platform. When migrating to Office 365, there's no better platform to run the migration on than Microsoft's own cloud service deployment, hosting and management environment. Azure provides on-demand processing power to run the migration. Plus, no email messages are ever stored in Azure, ensuring privacy needs are met. On Demand Migration for Email delivers a scalable solution that can accommodate any number of mailboxes and ensures a quick, low-cost, highly secure migration.

> On Demand Migration for Email delivers a scalable solution that can accommodate any number of mailboxes and ensures a quick, low-cost, highly secure migration.

BENEFITS:

- Ensures a quick, reliable and low cost migration to Office 365, Exchange 2010/2013/2016 or hosted Exchange

- Migrates some or all users simultaneously

- Migrates with no on-premises deployment needed

- Ensures security of confidential data during migration

- Provides pay-as-you-go options to spread the investment over time

Target platforms

- Office 365
- Exchange 2010/2013/2016
- Hosted Exchange

On Demand Migration for Email quickly and securely migrates email, calendar and folder data to Office 365 and Exchange without having to install or maintain migration software.

FEATURES

Zero footprint — Provides all the benefits of software as a service (SaaS), eliminating the need to install or maintain a solution on premises.

Personal archive migration — Supports personal archives on the source and target environments to preserve critical information and provide flexibility in managing historical content.

Label conversion — Migrates email folders while maintaining their labels and nested structure.

Contextual help — Provides in-line help and videos based on the user's current location and activity, which helps ensure a smooth and simple migration process.

Deduplicator — Re-migrates data without creating duplicates using a phased approach.

Assured security — Ensures the security of your organization's confidential and proprietary data throughout the migration process.

Live logging — Enables you to monitor the progress of each migration, including the status and any errors that may occur.

Intuitive management — Provides consolidated access and control with real-time status updates on the entire migration.

Data filtering — Provides the ability to filter email and calendar events by age or to exclude source email folders. These filtering options enable you to migrate only what you want, where you want it.

Multi-threaded migration — Supports multiple, simultaneous migrations, ensuring your project completes on time.

Cloud-based forwarding — Provides automated mail routing updates in some scenarios to streamline the transition processes.

ABOUT MERGER IT

Merger IT helps customers with solutions to assisting their organisations, providing the innovation of products which will enhance M&A activities delivery, and provide outcomes, through tried and tested toolsets and processes.

This ensures customers' requirements and outcomes are expedited leveraging the experience provided by Merger IT.
