

ENABLING STABLE IT FOR BUSINESS GROWTH

Change Auditor for Exchange

Real-time auditing for Exchange and Exchange Online

Email has become the predominant business tool for communication within and between organizations. As a result, email serves as a repository of information — some of it sensitive and vulnerable to misuse. Many organizational policy violations go undetected because most security actions are not audited. This can result in lost productivity and system downtime — a risk no organization should take.

Today, companies need in-depth auditing and reporting for Microsoft Exchange Server and Office 365 security and compliance to prove regulatory compliance and drive efficiencies.

Quest® Change Auditor for Exchange proactively audits the activities taking place in your Exchange environment, prevents critical mailboxes from being accessed, and provides real-time, detailed alerts when vital changes occur. Continually being in the know helps you to prove compliance, drive security and improve uptime while proactively

auditing changes to Exchange Server and Exchange Online configurations and permissions. You'll have the ability to track, alert and report on Exchange and Exchange Online security and policy settings, as well as quickly troubleshoot other problems by automatically collecting all information related to major changes, including the original and current values.

AUDIT ALL CRITICAL CHANGES

Change Auditor for Exchange provides extensive, customizable auditing and reporting for all critical changes to Exchange Server and the hosted Exchange component of Office 365, including administrative groups, mailbox policies, public and private information store auditing, organizational changes such as ActiveSync mailbox policy changes, distribution list changes and more. You'll get complete visibility into all changes over the course of time and in chronological order with in-depth forensics on who, what, where, when, why and from which workstation, including any related event details with

BENEFITS:

- Installs in minutes with fast event collection for immediate analysis of Exchange and Exchange Online environments
- Enables enterprise-wide auditing and compliance from a single client
- Strengthens internal controls by preventing access to sensitive or critical mailboxes and limits control of authorized users
- Reduces security risks by sending real-time alerts to any device for immediate response
- Eliminates unknown security concerns, ensuring continuous access to Exchange and Exchange Online configurations, mailboxes and users by tracking all events and those changes related to specific incidents
- Drives availability by enabling proactive troubleshooting of changes to policies and Exchange public folders
- Reduces the performance drag on servers and saves storage resources by collecting events without the use of native auditing
- Streamlines compliance reporting for internal policies and external regulations, including GDPR, SOX, PCI DSS, HIPAA, FISMA, SAS 70 and more
- Turns information into intelligent, in-depth forensics for auditors and management

Exchange users gain ROI in months

69 percent of surveyed IT organizations who selected Change Auditor for Exchange paid back their investment in six to nine months or less.

SYSTEM REQUIREMENTS

For a full list of detailed requirements, please review the Release Notes Guide.

before and after values. And, with realtime alerts to any device, you'll maintain constant awareness of and the ability to respond to vital policy changes as they occur, reducing the risks associated with day-to-day modifications.

TRACK USER ACTIVITY AND PROTECT SENSITIVE MAILBOXES

Change Auditor for Exchange helps tighten enterprise-wide auditing and compliance policies by tracking user and administrator activity for user account and delivery restriction changes. Change Auditor also prevents unauthorized users from gaining access to mailboxes and provides information on administrators and users who have gained access into another user's mailbox. You'll see exactly who accessed, deleted, copied, moved or created emails from that mailbox. With 24x7 real-time alerts, in-depth analysis and reporting capabilities, your Exchange and Exchange Online infrastructures are protected from exposure to suspicious behavior or unauthorized access, and are always in compliance with corporate and government standards.

AUDIT MOBILE DEVICES WITH ACTIVESYNC

Use Microsoft's ActiveSync technology to audit mobile devices and track email and calendar access, device registration and more.

TURN IRRELEVANT DATA INTO MEANINGFUL INFORMATION TO DRIVE SECURITY AND COMPLIANCE

Change Auditor for Exchange tracks critical changes to your Exchange and Exchange Online environments, then translates raw data into meaningful intelligent data to help safeguard the security and compliance of your infrastructure. Auditing limitations become a thing of the past due to Change Auditor's high-performance

auditing engine, and without the need for native audit logs, you see faster results and savings of storage resources.

INTEGRATED EVENT FORWARDING

Easily integrate with SIEM solutions to forward Change Auditor events to Splunk, Micro Focus ArcSight or IBM QRadar. Additionally, Change Auditor integrates with Quest® InTrust® for long-term 20:1 compressed event storage and aggregation of native or third-party logs to reduce storage costs on SIEM forwarding and create a highly compressed log repository.

AUTOMATE REPORTING FOR CORPORATE AND GOVERNMENT REGULATIONS

Utilizing Microsoft's SQL Reporting Services (SRS), Change Auditor for Exchange provides clean, meaningful security and compliance reports on the fly. With a built-in compliance library and the ability to build your own custom reports, proving compliance for standards such as the General Data Protection Regulation (GDPR), Sarbanes-Oxley (SOX), Payment Card Industry Data Security Standard (PCI DSS), Health Insurance Portability and Accountability Act (HIPAA), Federal Information Security Management Act (FISMA) and Statement on Auditing Standards No. 70 (SAS 70) is a breeze.

ABOUT MERGER IT

Merger IT helps customers with solutions to assisting their organisations, providing the innovation of products which will enhance M&A activities delivery, and provide outcomes, through tried and tested toolsets and processes.

This ensures customers' requirements and outcomes are expedited leveraging the experience provided by Merger IT.
