

Migration Manager for Exchange

ZeroIMPACT migration and consolidation to Exchange 2016 or Office 365 with coexistence

Exchange migrations and consolidations can be time consuming, labor intensive and fraught with risk. Whether you're dealing with business disruptions, tight timelines, limited budget and resources, or just a complex project, you need help keeping the project on track — and ahead of schedule wherever possible. Your IT staff's reputation is also on the line here. Luckily, we can help.

Migration Manager for Exchange eliminates the risk of consolidating Exchange or Office 365 environments. The solution enables you to:

- Synchronize mailboxes, public folders and calendar information
- Maintain coexistence throughout your migration project

And thanks to Migration Manager's automation capabilities, advanced project management and award-winning, 24x7 tech support, you can ensure a successful migration with fewer headaches.

FEATURES

ZeroIMPACT migration — Enable users to continue accessing their workstations, resources and email, regardless of their migration status, to ensure business continuity. Because users experience no disruption during the migration, the help desk is free to focus on other priorities.

Direct synchronization — Deliver true coexistence between migrated and unmigrated users by directly synchronizing mailboxes, distribution groups, calendars and public folders in parallel.

Public folder migration — Complete migration and coexistence for on-premises public folders, allowing users to continue to use them throughout the duration of the migration project. Migration Manager creates a recycle bin for public folders during the migration project to minimize problems with deleted public folders and items within public folders during the migration.

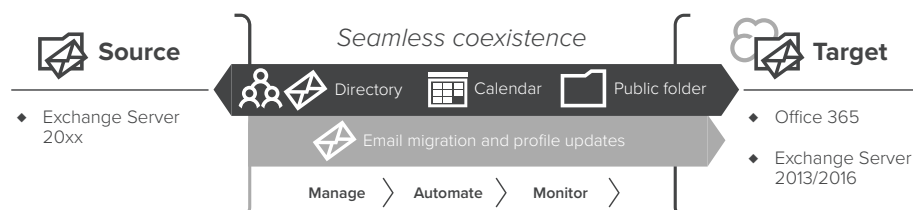

“The migrations ran smoothly, with no data loss and no unplanned downtime ... only 1 percent of users experienced real migration problems, which is phenomenally low.”

Andy Spurway, Head of Information Services Delivery, Wiltshire Council

BENEFITS:

- Mitigates the risks involved in migration, consolidation and restructuring projects
- Ensures that users can continue working, totally unaware that the migration is in progress
- Prevents any increase in migration-related calls to the help desk
- Shortens project timelines so you can complete your project on time and under budget
- Eliminates the need to visit each workstation for profile updating
- Lets you migrate when you want to, not just after hours
- Enables you to use fewer resources
- Provides up-to-the-minute reports for management so you don't have to

ZeroIMPACT Exchange Migration

SYSTEM REQUIREMENTS

PLATFORM

Intel x86

AMD 64

Intel EM64T

MEMORY

1GB or more

HARD DISK SPACE

Minimum 300MB

OPERATING SYSTEM

Microsoft Windows Server
2012 (x64 edition)

Microsoft Windows Server
2012 R2 (x64 edition)

Microsoft Windows Server
2008 R2 Service Pack 1 or
higher (x64 edition)

Microsoft Windows 7 Service
Pack 1 or higher (x64 edition)

ADDITIONAL SOFTWARE

Version 6.5.8190.0 or later of
Microsoft Exchange Server
MAPI Client and Collaboration
Data Objects 1.2.1

Live reporting — When it comes to reporting, you need to make informed decisions and take control of your Exchange migration project. Migration Manager provides real-time status of your migration and the ability to troubleshoot issues as they occur.

Comprehensive management tools — Utilize a single interface to eliminate the need to toggle between different applications to access various management functions. Migration Manager allows you to stage users for complete control of your migration.

Distributed architecture — Reduce network bandwidth requirements and support a more rapid Exchange migration and synchronization process with distributed architecture. All data is routed between the source and target Exchange servers rather than going through the Migration Manager console.

Automated updates — Reduce the chance of errors and save valuable administrative time through automation. When each migrated user logs on to the network, their Outlook® profile is automatically updated, eliminating the need to visit every workstation and manually reconfigure profiles.

Migration scheduling — Stage collections and schedule the migration during dates and times the project manager selects, providing the flexibility needed for a complex consolidation project.

Services and support — Ensure a successful migration with Quest's experienced professional services team and 24x7 product support. Because of the risk associated with an Exchange consolidation project, Quest provides world-class assistance with completing the migration project on time and on budget.

ABOUT MERGER IT

Merger IT helps customers with solutions to assisting their organisations, providing the innovation of products which will enhance M&A activities delivery, and provide outcomes, through tried and tested toolsets and processes.

This ensures customers' requirements and outcomes are expedited leveraging the experience provided by Merger IT.
