Established in the 1960's, Heritage Crossings offers skilled nursing care, adult day care, and an assisted living facility, providing a continuum of services for the elderly. Hospice services are also available. Heritage Crossings is licensed for 68 nursing home residents and 30 assisted living residents in 18 apartments. Also located on the campus are 4 independent living cottages with 2 bedrooms in each of the cottages.

Our activities are programmed to meet the residents' needs and requests. We offer van outings to participate in community events outside the facility. We also provide in-house activities which are scheduled seven days a week and also in the evenings! Our activity and social services staffs are cross-trained, so whether it's a large or small group offering or a 1 to 1 activity, there is always someone available to keep the programs going and to work with our residents to make each day the best it can be. Staff and residents ride side by side on parade floats during Geneva's parades, and also take walks or wheelchair rides on the spacious, beautifully landscaped campus. It is not unusual to see staff, family, and friends take time out from their busy schedules to bring their pets or children in for the residents to enjoy.
