HELPING SMALLER BUSINESSES WORK SMARTER

EMAIL | MESSAGING | VOICE

Kerio Operator

Enterprise-Class Phone System
without Enterprise Complexity

Kerio Operator

Connect. Communicate. Collaborate. Securely.

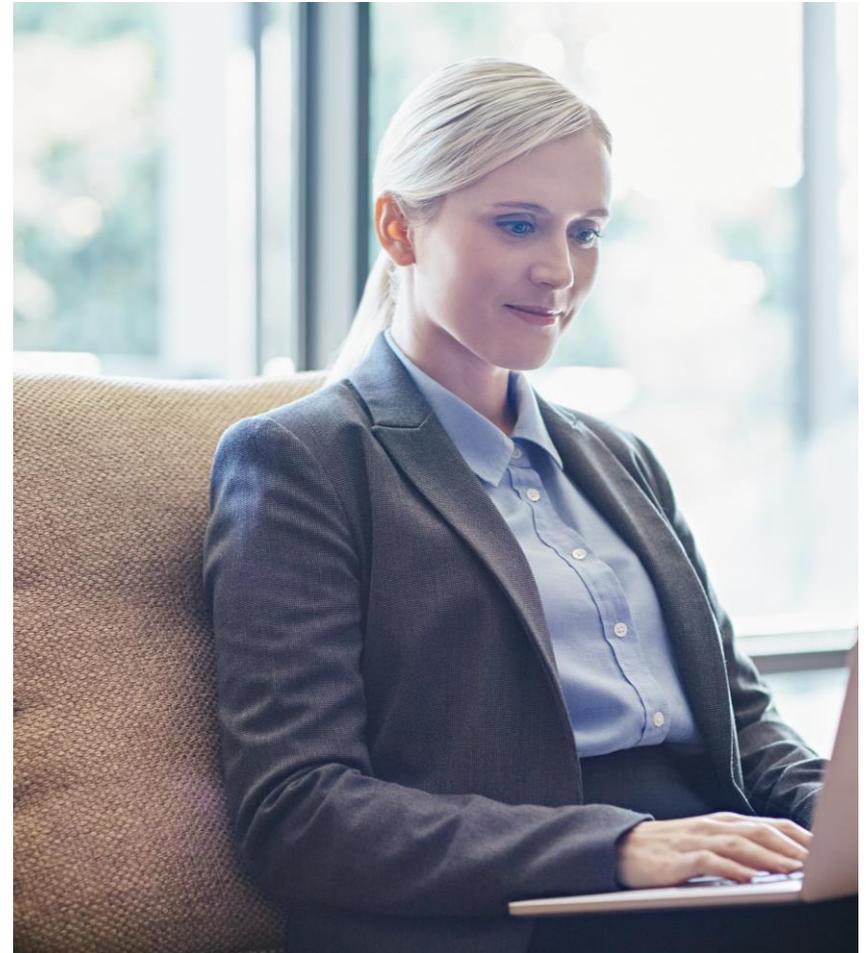

VoIP based phone system that provides powerful yet affordable enterprise-class voice and video communication capabilities.

Take Your Office Desk Phone with You

- Your computer is your phone
 - Voice and video calls
 - Listen to voicemail
 - Call forwarding
 - Call history
 - Mac, Windows, Linux, or a web browser
- Your business number is mobile
 - Bring your own device
 - Calls use the data network, not your call plan minutes
 - iOS and Android

Capabilities People Love

- Computer audio and video calls
- Dynamic conference calls
- Receive voicemail by email
- Easy and flexible call forwarding
- BYOD friendly
- Salesforce integration

Cost Savings

- Bypass the Telco
 - SIP based calling offers big cost savings over traditional telephony
- Lite on Equipment
 - Low system requirements
 - No specialized hardware or cabling
- Phone Freedom
 - Choose the phone that fits your budget
 - Over one hundred popular business phone models supported
 - Get rid of the desk phone all together by using the Kerio Operator Softphone

Uncompromised Security

- Encrypted Communications
 - Encrypted calls and secure web access via Transport Layer Security
- Anomalous Behavior Detection
 - Automatically detect and block suspicious activity
- Hardened Operating System with Integrated Firewall
 - Firewall policy and operating system managed by Kerio Operator

Flexible Deployment

Choose what's best for your network:

- Cloud
 - Leverage a scalable, professionally managed and maintained infrastructure
- Hardware
 - Powerful, purpose built, solid state box
- Software
 - Bring your own box, install the operating system bare metal
- Virtual
 - Deploy as a virtual appliance for VMware or Hyper-V

Summary

Simplicity. Security. Stability.

- Powerful and cost-effective VoIP based phone system
- Robust voice and video communication capabilities
- Uncompromised security
- Rapid & flexible deployment
- Fits any IT environment

Thank You!
