Full-featured VoIP business phone system managed via an intuitive web interface as well as advanced enterprise features and complete mobile support.

About Kerio Control

Kerio Control Overview

Connect. Communicate. Collaborate. Securely.

Unified Threat Management Without Complexity

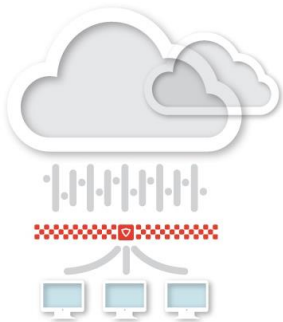

Next-Generation Firewall, Router
and Leading-Edge IPS

Advanced Antivirus Protection

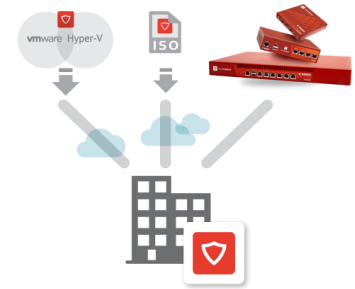

Secure VPN

Industry-Leading Web Content
and Application Filtering

Unmatched Quality of Service

Flexible Deployment

Top 3 Business Reasons for Kerio Control

1. Protect your business network
 - Powerful, effective and reliable security solution used by 33,000+ businesses worldwide
2. Low cost of ownership
 - Easy to administer
 - Flexible deployment options
 - All-in-one pricing model, low annual renewal fees
3. Increase productivity, decrease liability
 - Block inappropriate or unwanted content while monitoring end user Internet and application usage

Strong Network Protection

- Deep packet inspection with advanced IPv4 and IPv6 network routing
- Intrusion protection (IPS) – Snort analysis with rules and blacklist database
- Integrated Sophos Gateway Antivirus service prevents viruses, worms, Trojans and spyware (optional feature)

Bandwidth and Traffic Management

- Monitor and prioritize network traffic
- Distribute traffic across multiple links to automatically ensure continuous Internet access
- Restrict inbound and outbound user traffic by URL, application, traffic & content types, and time of day

Flexible Filtering and Control

- Restrict inappropriate or bandwidth-hogging traffic with inbound and outbound traffic policies
- Selectively block or log access to over 140 categories of web content and applications with Kerio Control Web Filter w/ application awareness (optional)
- View individual user Internet activity with automatic, detailed reports with integrated Kerio Control Statistics

Intuitive Administration

- Full web-based administration from any browser or device
- Configure traffic policies, bandwidth management and user rules from anywhere
- Customizable dashboard gives quick-view to real-time system health, traffic charts and more
- Automatic software upgrades

Remote Management and Mobile Notifications through MyKerio

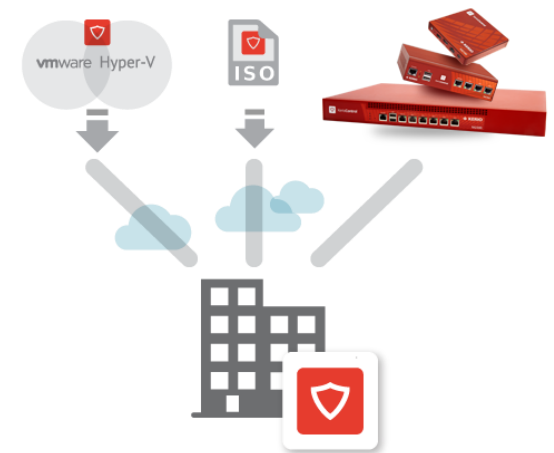

- Centralized web interface for all managed appliances
- Consolidated system information
- Automatic configuration backup
- Status monitoring
- System notifications
- Complete remote configuration
- Apple Watch app

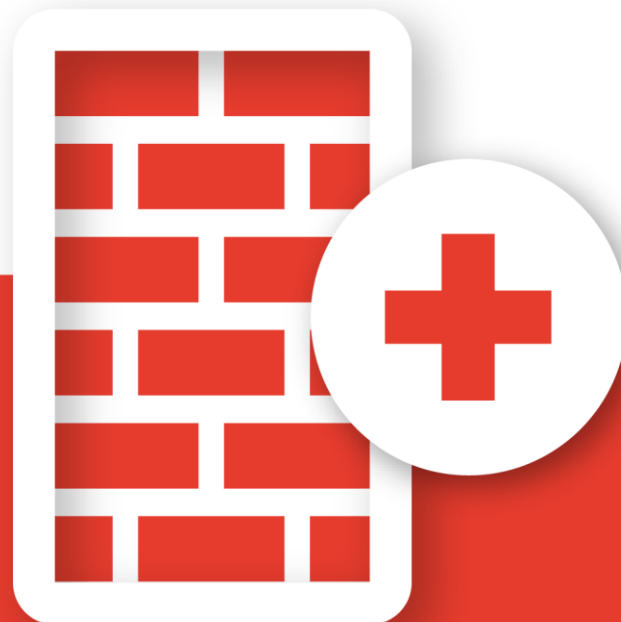

Rapid and Flexible Deployment

- Deploy rapidly in any IT environment with multiple deployment options (ISO, Virtual Machine, Hardware Appliances)
- Backup configuration and custom settings to [MyKerio](#) or FTP
- Remotely deploy hardware appliances with self-provisioning through [MyKerio](#).

Kerio Control Licensing

Software and Virtual Appliances: Simple, Straightforward Product Licensing

- Software license includes software maintenance and support for one year
- Two extensions available
 - **Sophos Antivirus**
 - **Kerio Control Web Filter w/ application awareness**
- Annual software maintenance keeps your system current
 - **Updates include new features, improved performance, and enhanced security**
 - **Two major software updates and multiple minor updates per year**
 - **Automatic software updates**
- Add additional users any time

Kerio Control NG series: All Inclusive Hardware Appliances

- Self-Provisioning
- No user limit option
- User limit available for NG300 and NG500
 - **Provides a lower cost alternative for those that want higher performance for a smaller number of users**
- All hardware appliances include one year of software maintenance and support, Kerio Control Web Filter w/ application awareness and Sophos Antivirus extensions.

Kerio Control NG100

User limit – no limit
UTM throughput – 30Mbps

Kerio Control NG300

User limit – up to 25 or no limit
UTM throughput – 80Mbps

Kerio Control NG500

User limit – up to 100 or no limit
UTM throughput – 280Mbps

Regional Considerations

- Software ISO & Virtual Appliances available globally
- As of June 2016, Kerio Control hardware appliances available in...
 - USA/Canada
 - Latin America
 - Australia/New Zealand
 - European Union

Summary
