

Leon Oloya is a native of San Diego, CA. He is a graduate of New Mexico State University with a degree in Civil Engineering, and later from Rice University with an MBA.

Leon began his career in 2004, providing engineering support for the ExxonMobil pipelines in the Southeast Louisiana and Mississippi area. In 2006, Leon moved to the Los Angeles area to provide similar engineering support for the pipelines and terminals in that region. In 2008, he moved back to the Houston area, assuming the roles on the operation and commercial side of the pipeline business. Towards the end of 2012, Leon moved to the Baton Rouge Refinery, where he held several supervisory positions. In 2016, Leon moved back to Houston and is currently the crude oil optimizer for ExxonMobil's Baton Rouge Refinery.

Leon and his wife (Madalyn) have a 9 year daughter and 5 year old daughter. He enjoys exercising, golf, traveling and any activities involving his kids.
