

What is the CO₂RE Intima treatment like?

The CO₂RE Intima laser treatment is a simple, non-surgical procedure. Your physician will deliver gentle laser energy to the vaginal wall that stimulates a healing response and enhances moisture levels in the vaginal canal.

This results in remodeling of the tissue fibers, thereby restoring flexibility and shape. The procedure delivers both immediate and long-lasting relief in a painless, non-surgical, proven treatment.

Results of CO₂RE Intima Treatment

a. Before CO₂RE Intima treatment

b. After the CO₂RE Intima Treatment
Tissue remodeling and neocollagenesis of the vaginal canal caused by the thermal effect of CO₂RE.

What Real Patients Are Saying

I found that the dryness and itching I was experiencing completely disappeared.

P.V., Madrid, Spain

I sometimes had trouble with leaking urine and I noticed an improvement in my ability to retain urine after the first treatment and it improved even more after the second treatment.

I.G., Madrid, Spain

I highly recommend this treatment. It was very easy to undergo and very tolerable. I noticed increased lubrication and a sensation of feeling tighter.

🌿 Women's intimate wellness.

🌿 Non-surgical. Effective.

🌿 Quick, comfortable, in-office procedure.

SYNERON CANDELA®

Women's Intimate Wellness

Loss of vaginal tone can be a side effect of natural childbirth and aging. Over time, the vaginal wall, which contains collagen fibers, can stretch and lose tissue tone and elasticity. Unwanted personal stress can be caused by leaking urine when sneezing or coughing due to loose vaginal tone.

Women may experience unwanted pigmentary changes in the vulvar area. Painful intercourse, itching or burning in the genital area can occur as we age. Reduced estrogen levels can lead to a loss of vaginal lubrication.

With CO₂RE Intima, your physician can now treat these symptoms without medication or surgery. With CO₂RE Intima, women regain their intimate wellness in a painless, non-surgical, proven treatment.

Women Report High Satisfaction with CO₂RE Intima Treatments¹

81%

reported an improvement in sexual gratification.

94%

reported an improvement in vaginal rejuvenation.

100%

reported satisfaction with treatment and 94% would recommend it.

Why CO₂RE Intima treatments?

- Safe, quick and easy in-office procedure
- Non-surgical, incisionless
- Mild to no discomfort
- Walk-in, walk-out treatment
- Symptom relief after just one treatment

How long does treatment last?

A series of up to 3 treatments are typically done. The treatment lasts about 10 minutes.

A once-a-year single treatment is recommended to maintain symptom relief. This can be done quickly and conveniently during your annual checkup.

Does the CO₂RE Intima treatment hurt?

The treatment itself is painless. Some patients report mild discomfort with the laser handpiece tip insertion during the first procedure due to vaginal dryness.

How soon can you expect results?

Many patients have reported that they experience relief right away. Virtually all patients have experienced relief after the first treatment.

Is it safe?

CO₂RE Intima offers solutions for a range of intimate aesthetic procedures. Treatments are safe and effective with mild to no discomfort, and with little downtime.

In a recent survey of American women²

- 43% had heard of vaginal rejuvenation
- 27% would consider a vaginal rejuvenation treatment
- 66% suffer from stress urinary incontinence
- 75% suffer from vaginal dryness
