Hill Rom Transtar Refurbished Transport Stretcher & New Mattress
Order #132419 \$2195.00

Hill-Rom's rugged Procedural Stretcher is the ideal choice for emergency, OR, PACU, or outpatient settings. This stretcher offers outstanding mobility, comfort, and quality.

Hill-Rom P8000 Procedural Stretcher Benefits:

Mobility: Why struggle to steer and stop? An optional active hand brake reduces strain of going down ramps and sudden stops. Our integrated IV pole transport device option helps you to maneuver stretcher and portable IV pole stands with ease. The next generation Steering Plus System allows crisp cornering and control.

Comfort: Reduce patient-handling risk and enhance your and your patient's comfort. The BackSaver Fowler feature provides you with easier articulation of the head section. Combine it with the AutoContour feature to minimize repositioning of patients.

Quality: Our reinforced frames are made of heavy-gauge, automotive-grade steel for long-lasting quality - and a 700 lb weight capacity option to handle higher patient weights. Nickel-plated push handles, IV poles, siderails, and other components offer superior rust resistance, even in harsh environments.

Hill-Rom P8000 Procedural Stretcher Features:

- Standard mattress pad.
- Retractable side rails with full extension bumper.
- Permanent IV pole.
- Transport handles.
- Knee section articulation crank.
- Oxygen tank holder.
- Hilow and Trendelenburg/reverse control pedals.
- 4 drainage bag holders.
- Brake/steer pedals - head and foot.
- Low height for safer stretcher ingress and egress - best in class.
- Power washable.
