

## SC-3 Features

The SC-3 features 3 stainless steel rollers, with the bottom roller being threaded to reduce splashing and guide the juice into your container. As you can see in the diagram (pictured bottom right), the SC-3 is extremely easy to disassemble. The rollers, along with the juice compartment, are removable for easy cleaning. Just wipe down the machine with a mild detergent and you are finished.

This machine also features an overload protection that will protect the motor in case the machine jams. In the event this does occur, the forward and reverse switch will unjam the unit. The featured gear box reduces the stress on the ½ HP motor, while adding more torque to process even the toughest cane.

## Invest in Quality

The SC-3 Sugarcane Juicer is constructed with Stainless Steel that will hold up wonderfully in any busy environment. It utilizes a safety switch so that the customer cannot access the machine when the front guard is removed.

This machine offers a one year warranty, the longest warranty in the business because we stand behind our product 100%. Since 1982 we have been specializing in juicers and corers with the highest quality equipment available in the industry today and have juicers that will process anything from apples to wheatgrass. We take pride in our customer service and support.

## Space Saving Specs
