Wireless Oil & Gas Safety System

Flexible

Utilize your existing sensors-or choose one of ours-it's your choice.

Simple

By using the generic Sensor Interface, integration is already done. Setup is quick and easy.

Compliant

Every component of the Wireless Oil & Gas Safety System is Class 1, Div 2

Advanced

No need to utilize the cloud if you don't want to- bz has refined the capability to get from the sensor to an off-site office, without using a cloud network

System Features

- Reliable and fail-safe
- Class 1, Div 2
- Electrical or pneumatic control and shut-down
- Variety of back-haul options
- Multiple Data Aggregation Options (wireless & wired internet, cellular, long range wireless and satellite)
- Easy to Install
