

VEGETATION MANAGEMENT & LAND CLEARING

PALADINTM
POWERFUL ATTACHMENT TOOLS

We are your *ONE STOP SHOP*
for all your attachment needs!

Look inside to see our **NEW** products!

Dear Contractor, Farmer, or Land Manager,

Paladin Attachments would like to be the one-stop-shop for all your powered attachment needs. We are the *largest* USA manufacturer of attachments for Compact Tool Carriers, Compact Tractors, Skid Steer Loaders, Excavators, Mini-Excavators, Telehandlers, Backhoe Loaders and Wheel Loaders of all sizes. We have working relationships with all the major OEM Equipment manufacturers so you can have confidence our attachments will be compatible with your brand and model of powered equipment

We have more types of attachments available than **any other** manufacturer for use in clearing vegetation including our best-selling Ground Shark™ family of brush cutters, Bradco Series II Mulchers, Stump Grinders, Root Rakes, and Brush Grapples. The Ground Shark™ Extreme Duty Brush Cutter was named one of the top 50 new products by Equipment Today for 2013.

This year we are introducing three new vegetation management attachments that are exclusive to Paladin. The Bradco Excavator Flail Mower can cut all types of vegetation to 4 inches in diameter. It is especially well-suited for embankments, ditches, roadsides, and shorelines. The JAWZ™ Grabbing Tool can pull invasive trees, bushes, and other unwanted vegetation out of the ground roots-in-all eliminating the need for herbicides or burning. The Bradco Quik Pik™ Multipurpose Grapple functions as a brush, log, and general material handling grapple. To really get a feel of their capabilities, check out their videos on You Tube.

Our attachments are durable, reliable, easy to maintain, and designed to keep working for you under the most challenging conditions. We build our attachments to the highest quality and back them up with a warranty, professional training, customer service, and technical support. We have over 200 years of collected experience in engineering, customer service, and technical support so you can trust Paladin Attachments to be there for you year after year. We can also provide wear parts and maintenance kits custom designed for our products.

Please take a few minutes to review the attached brochure for details about our vegetation management line of attachments. We now offer 0% financing for 24 months through TD Bank's Yard Card program. Visit your local Paladin dealer to learn more and/or place an order. If you need help locating a Paladin dealer, feel free to call our customer service department at 1-800-456-7100.

Best Wishes
Stephen Kingsley
Marketing Manager Light Products.

QUICK REFERENCE CHART

Land Management and Brush Cutting			
Product	Standard JAWZ™ Grabbing Tool	Ground Shark Standard Duty Brushcutter	Ground Shark Extreme Duty Ground Shark
Prime Mover	SSL	SSL	SSL (High Flow)
Application	Quickly remove invasive trees and large shrubs up to 8" in diameter, roots included.	Grass, medium density brush, and hardwoods up to 4" in diameter	Best for landclearing and maintenance of heavy ground vegetation. Clear heavy brush and hardwood trees up to 7" in diameter
Working Level	Ground Level	Ground Level	Ground Level
Size	33"	60, 72", 78"	72"
Additional Information	Complete removal of roots prevents grow back. No herbicides required.	Ideal for regular maintenance of light to medium ground vegetation	Optional carbide stump grinding teeth reduces material to small pieces.
			

Vegetation Maintenance and Heavy Mulching		
Bradco Flail Mower	Bradco Series II Mulcher	
3-10 ton Excavators	Excavator	SSL (High Flow) and Excavator (60" only)
Grass, medium density brush, and hardwoods up to 4" in diameter	Designed to reach up into tree tops and into hard to reach ground space. Clear hardwood trees up to 8" in diameter	Hardwood trees up to 8" in diameter
Ground Level to limit of excavator reach	Ground Level to limit of excavator reach	Ground Level and limit of excavator reach
30", 40"	36", 60"	60", 72"
Best for clearing fence lines, embankments, river and lake sides, growing areas, and roadsides.	Interchangeable tooth design options. Reversible cutter teeth double operational life. Finished material is reduced to small chips.	
		

Large Scale Forestry and Heavy Land Clearing		Stump Removal
Product	MH-88 Mulcher	Bradco Stump Grinder
Prime Mover	300-400HP Forestry Tractors	SSL
Application	Hardwood trees up to 20" in diameter	Grinding Hardwood Stumps
Working Level	Ground Level	Ground Level
Size	88"	26" and 30" Wheel
Additional Information	Designed for industrial landclearing jobs where hardwoods up to 20" in diameter need to be reduced to small chips.	Quickly grind stumps into small chips.
		

Vegetative Material Handling		
FFC Brush Grapple	Bradco Root Rake	Quik Pik™ Multipurpose Grapple
SSL	SSL	SSL
Collecting and transporting vegetation of all types	Remove and transport roots and vegetation	General material handling, logs, and vegetation of all types.
Ground Level	Ground Level	Ground Level
60", 66", 72"	72", 78", 84"	63"
High strength pins and cushioned cylinders	Replaceable pin-on H&L style teeth and replaceable hardened steel bushings. D ring for additional applications.	Optional brush rake assembly can carry twice the amount of vegetation as conventional brush grapples.
		

**GROUND SHARK™
BRUSH CUTTERS**

**NEW
FOR 2014**

The award winning Ground Shark™ family of brush cutters have been engineered to handle your toughest vegetation management jobs. They are ideal for roadside maintenance, right of way clearing, site preparation, fire control, fence line maintenance, and trail maintenance.

The **NEW Ground Shark™ Standard Duty Brush Cutter** is designed to clear light to medium density brush and hardwoods up to 4” in diameter. The entirely new drive train runs smooth and quiet while moving easily to clear the toughest material.

The **NEW Ground Shark™ Extreme Duty Brush Cutter** is designed to clear medium to heavy density brush and hardwoods up to 7” in diameter. When the exclusive, patent pending retractable forward shield comes in contact with a tree, it moves up and back to expose the entire cutting edge of each blade while protecting the operator from flying debris.

FLAIL MOWERS

**NEW
FOR 2014**

The **NEW Bradco Flail Mowers** turn an excavator into an efficient brush cutter and mower for hillsides, ditches, shorelines, fields, and more. The highly engineered drive trains have been designed to greatly extend operating life, reduce maintenance costs, and maximize operational safety factors.

MULCHERS

The **Bradco Series II Mulchers** are available in skid steer loader and excavator mounted versions. They are capable of turning entire trees up to 8 inches in diameter into small chips of wood in minutes.

GRAPPLES

FFC Brush Grapples are fabricated with high-strength steel and replaceable hardened steel bushings that ensure durability and long operational life. A pilot operated check valve allows independent movement of the grapple arms facilitating stabilization of irregular loads that are common in this type of application.

QUIK PIK™ MULTI-PURPOSE GRAPPLE

**NEW
FOR 2014**

The **NEW Bradco Quik Pik™ Multi-Purpose Grapple** for skid steer loaders is a unique, patented, and versatile attachment that is the multi-tool of material handling. The Quik Pik™ is the only attachment versatile enough to manage brush, logs, hay bales, rocks, pipe/culverts, as well as standard pallet jobs. The base unit with its patented dual hydraulic boom and curved tines allow safe handling of materials such as hay bales, metal cylinders, boulders, culverts, etc. Additional stability is provided because the boom also features articulated curved tines that wrap around and against irregular-shaped objects and loads.

Combine the base unit with the optional fork tines and/or brush rake and you have the material handling capability of multiple attachments such as pallet forks, brush grapples, bale spears, manure forks, rock grapples, and log grapples all in one multi-purpose attachment.

STUMP GRINDERS

Bradco Stump Grinders are designed to be easy to use and maintain. They are operated by the skid-steer auxiliary hydraulics and mount to the quick attach mechanism for easy operator hook-up. Bradco's SG26 & SG30 models have proven heavy-duty gearbox drives with torque arm motor support for longer motor and drive system life. Easy access to all drive components allows for quick maintenance.

Operate with the multi-function control inside the loader with excellent operating visibility and exceptional swing arc geometry. An adjustable speed control has been designed into the unit to allow the operator to adjust the speed of the swing and lift functions to accommodate maximum performance.

The Bradco Stump Grinder's built-in grouser pads provide exceptional stability during cutting and grip for your uneven ground and hill sides. While the tooth pattern allows side-to-side or vertical cutting up to 12" below ground level.

JAWZ™ GRABBING TOOL

**NEW
FOR 2014**

The **NEW Bradco JAWZ™ Grabbing Tool** allows you to easily remove invasive trees and shrubs. It features a patented, dual cylinder powered set of T1 Steel fingers or “pinchers” that grab the tree/shrub trunk with just the right amount of force to take advantage of the lifting power and leverage from your Skid Steer, Compact Tractor, or Compact Tool Carrier. Because the plant and roots can be removed completely without the requirement of herbicides or additional mechanical treatments, root grow-back is extremely unlikely. This is accomplished with minimal impact to the environment so indigenous species can gain a foothold again. The Super JAWZ™ Grabbing Tool will soon be available for large wheel loaders.

ROOT RAKE

Bradco's heavy duty **Root Rake** allows you to remove roots while leaving the soil at the job site with aggressive tine and grapple profiles that lock material in place and stabilize during transport. The leading edge of the grapple travels in a range of motion that pulls material into the bucket area to optimize its large capacity for brush and debris. Bradco's Root Rake is constructed of high strength steel with replaceable pin-on H&L-230 style teeth for durability, serviceability, and extended operational life.
