

FIGURE 7. Scatter plot of the relationship between GDP per capita and proportion of residents who report that homosexuality is *never* justified (Society N=86)

DATA SOURCES: ARDA's Cross-National Socio-Economic and Religion Data, 2011; WVS, waves 4, 5, and 6.

NOTE: The WVS includes three societies (Andorra, Puerto Rico, and Taiwan) that are not technically countries. Norway (2008 GDP=\$94,759; 6.4% never justified) is excluded because it makes the trend line particularly steep. To improve visualization some labels have been removed.
