

# Our class is participating in the **Change Champions Coin Drive** the week of:

Autism is a disability that affects how children relate to other people, communicate and learn.

Some students with autism need a lot of special help and some do well with only a little help.

Please bring in your change and donate to Change Champions to help kids with autism enjoy the same activities we all love!

**AUTISM SOCIETY**  
Improving the Lives of All Affected by Autism  
Southeastern Wisconsin

## Where do the donations go?

These are just some of the fun programs that your money will help fund:

The Kids in Motion event allows children to experience imaginative play in an environment that is not over-stimulating.

The iCan Bike program gives children and adults with disabilities the opportunity to learn how to ride a two-wheel bike in a safe and encouraging environment.

Everyone loves laser tag but it is especially nice when it is modified to be sensory friendly.

At Fun Timez children jump, bounce and play. Regular exercise is important for children and the activities here help improve balance and motor skills.

Water parks can be extra noisy, have long lines and be very crowded. The Autism Society of SE WI and Cool Waters modifies the environment to make it fun for children with autism.

On Lego Fun Days we build cool kits like Star Wars, Minecraft and Superheroes. Legos improve fine motor skills while having fun.

If your school donates at least \$500, the class that donates the most money wins a pizza party!
