

As an alternative to expensive school trips to the zoo, where many of the creatures are only visible through glass or behind tall fencing, Bugs 'n' Bones bring animals to your school, providing an **INTERACTIVE, EXCITING** and **EDUCATIONAL** experience for your children.

Catering to all your curriculum needs, Bugs 'n' Bones will come into school and hold workshops with each Key Stage. Offering a hands-on learning opportunity, the children get to handle, under supervision, all manner of reptiles, snakes and invertebrates.

It is highly interactive and bursting with fun facts about each creature. We provide an exciting memory which will inspire the next generation of Zoologists.

“ A highly educational experience delivered by animated and captivating experts. The children loved being hands-on with the animals and meeting some they never even knew existed!

from Brookside Under 5s Pre-school

“ The children were in their element when looking at and stroking the animals. The excitement on their faces was fantastic!

from Lakeside Primary School, Derby
